Lab 10

Topic: Interactive Resume using Bootstrap

Description:

I have decided I will work on a Bootstrap application that will showcase my resume for lab 10. Since this will be the last semester of my undergraduate degree, I will be applying for job positions and thought it would be beneficial to create an interactive resume with a taskbar. The taskbar will list different sections of my resume so that when an employer clicks on one, it will direct him to that particular section on my resume page. Additionally, this is also beneficial because I will gain practice with using Bootstrap which is imperative to know for web development; Bootstrap provides web development features that are responsive and scaled to use for any device. I will include the following sections: summary, contact, experience, skills, educations, and interests.

Application Screenshots:

- See lab10-resume-bootstrap.html for code
